PROJECTS

AI Code Reviewer (CodeSage) — React.js, Node.js, Express.js, Gemini API

Sep – Dec 2025

- Developed an AI-powered code analysis platform that reviews DSA code and generates optimized solutions, bug detection, and complexity analysis in real time.
- Integrated LLM APIs (Gemini) to generate structured feedback including improvements, refactored code, and performance insights.
- Designed scalable REST APIs using Node.js and Express.js for efficient processing of user input and AI-generated responses.
- Designed a responsive React-based UI with dynamic rendering and robust error handling to ensure a seamless user experience.

Krishi Sakhi — React.js, Node.js, OpenWeather API, MongoDB

Sep 2025

- Developed an AI-assisted smart farming platform leveraging real-time weather and crop data to improve agricultural decision-making.
- Integrated Open Weather API to deliver real-time weather insights, reducing crop risk and improving farming efficiency.
- Implemented farmer profile management with crop history tracking and AI-driven recommendations.
- Built a scalable backend using Node.js and MongoDB for secure data storage and efficient processing.

Crypto Rewards Platform — React.js, Node.js, MongoDB, Web3.js

Jan 2025

- Built a decentralized platform enabling users to earn cryptocurrency tokens through task completion and by play games.
- Integrated secure wallet authentication and real-time balance updates using Web3.js.
- Developed backend API to manage users, transactions, and reward distribution efficiently.
- Designed a mobile-responsive UI in React.js to enhance user engagement and transaction experience.
